

In 2025, we're dedicated to addressing two critical needs that will significantly impact the lives of our children and staff

Education Fund: This vital fund supports the holistic development of our children, covering essential needs such as: Quality education Nutritious food Comfortable clothing, access to medical care and Personal development resources

Part of our children in High school

Girls' Dormitory Construction: Our current dorms are overcrowded, compromising the health, safety, and well-being of our girls. The new dormitory will provide: A spacious and comfortable living environment, a secure and nurturing space A conducive setting for learning and growth

This new facility will be home to 250 girls and 21 female teachers, offering a supportive community where they can thrive.

Dormitory under construction
